Bridget Louise McCavanagh

Web Developer

I am an aspiring web developer, currently studying full stack development at the University of Western Australia, striving to graduate proficient in both back-end and front-end frameworks.

My background is varied and diverse, from an early career as a dancer, to working as an artist liaison within the event space, and successfully managing the bar of a popular Nightclub in Perth, Western Australia. Since 2015 I have focused on starting and running my own business as a personal trainer specializing in exercise for mental health management. This experience gives me insight and perspective across multiple industries and a wide range of work experience. While my roles have been diverse, a common theme being the need for a distinguished, relevant, and mature web presence and branding. My biggest goal in life, much like the advancement in technology, is exponential growth across any discipline.

Live every week like it's shark week.

Key Competancies

HTML5
CSS3
JavaScript ES6

CSS Frameworks including Bootstrap & Tailwind
Node
jQuery

GitHub

Development Experience

Web Development
- **Development using both front-end and back-end technologies**
- Develop cross-browser front-ends using JavaScript/jQuery, HTML, CSS and other languages as required.
- Develop and maintain code, utilizing common technologies such as Git to ensure source control and apply CI/CD principles.
- Develop, review, test, and debug code.
- Explore new development practices, web standards, and technologies for application on projects as appropriate.
- Application of consistent look and feel across multiple projects, executing designs in line with brand identity and business strategy.
